Dear Sir or Madam,

I am writing to express my strong motivation for the web development vacancy at EUMM. Despite my background in business administration, I have discovered a true passion for coding and the endless possibilities it presents. Over the past seven months, I have dedicated countless hours to learning various programming languages and have acquired a solid foundation in HTML, CSS, PHP, SCRUM and other relevant technologies and methods.

From an early age, I have been captivated by the world of invention. As a child, I found myself constantly tinkering and exploring, eager to understand how things worked and dreaming of creating something new. This innate curiosity and drive to innovate have been the driving forces behind my decision to pursue a career in web development.

Though lacking formal education and experience, I make up for it with my passion, dedication, and adaptability. I thrive in collaborative environments and believe my combination of business acumen and technical skills will bring a valuable perspective to EUMM. I am inspired by your commitment to innovation and confident that I can contribute to your cutting-edge digital solutions.

Thank you for considering my application. I am excited about the opportunity to discuss how my skills, passion, and unique background align with your requirements. Please find my attached resume for your review, and I look forward to the possibility of scheduling an interview.

Yours sincerely,

Amiran Gabelaia
